Serafin O. Gargantiel III

Chicago, IL | (773) 366-1153 | gargantielserafin@gmail.com | linkedin.com/in/serafingargantieliii | iamserafinnn.github.io

EDUCATION

COOP Careers Chicago, Illinois
Data Analytics Fellow *August 2026 - Present*
- Selected for a competitive 16-week data analytics fellowship, developing advanced skills in SQL, Tableau, Excel, and digital analytics through peer-led cohort training
- Collaborating in a structured cohort on hands-on data projects, technical workshops, and career development alongside industry-experienced captains
- Consists 200 hours of instruction spanning data tooling, professional communication, networking, and live client work with COOP's partner companies

CodePath V-SWEP Remote
Software Engineer Fellow *September 2026 - Present*
- Selected for the competitive CodePath V-SWEP Mentorship Program designed to bridge academic computer science and industry-level software engineering
- Paired with an industry mentor in 1:1 sessions to master advanced problem-solving frameworks and engineering workflows focusing on rigorous technical interview preparation
- Collaborating within the CodePath network to develop production-ready engineering skills and accelerate career technical readiness

University of Illinois at Chicago (UIC) | College of Engineering Chicago, Illinois
B.S. in Computer Science, Software Engineering Concentration *August 2022 - May 2026*

TECHNICAL SKILLS

Languages: C++, Python, SQL, Java, C, HTML/CSS
Frameworks & Libraries: React (front-end), Three.js, FastAPI, FAISS, PySpark, Pandas, Plotly
Tools & Platforms: Git/GitHub, VS Code, Linux CLI, PostgreSQL, Jupyter Notebook, Android Studio, IntelliJ IDEA, Tableau

PROJECTS

The Entry Portfolio - Personal Portfolio Website | *HTML, CSS, JavaScript* *Dec 2025 - Present*
- Designed and built a fully custom portfolio website from scratch without frameworks or templates, showcasing 10+ projects and 15+ experiences across software engineering, athletics, and organizations
- Implemented responsive layouts, smooth-scroll navigation, embedded video and image galleries, card modals, and an interactive contact form using vanilla JavaScript

Epicode - Amazon Product Reviews Semantic Search | *FAISS, PostgreSQL, FastAPI, React, Python* *Sep 2025 - Dec 2025*
- Engineered an AI-powered semantic search engine prototype over 800K+ Amazon reviews using FAISS vector indexing and PostgreSQL, reducing query latency by ~35%
- Rapidly prototyped a full-stack AI search interface by connecting a React/Vite UI with a FastAPI server deployed on Railway and GitHub Pages

WORK EXPERIENCE

IBM SkillsBuild Remote
AI Hacker for Space Exploration August Challenge *August 2026*
- Assisted in engineering a network of satellites to communicate orbitally in Python modeling store-and-forward packet routing between satellites, storage capacity, and transmission scheduling across 50-satellite constellations over 20+ simulated orbital periods.
- Implemented 3 configurable route-selection strategies (BFS shortest-hop, greedy distance, least-congested), improving packet delivery rate by 90% over the baseline across 50 constellation configurations
- Contributed to a 5-person team building two competing constellation optimizers with shared baseline tooling, JSON replay, and automated video rendering of network state over 20+ simulated runs

Revature Remote
Technical Data Engineer Trainee *June 2026 - August 2026*
- Completed an 8-week intensive pre-training program covering big data fundamentals, Python, and SQL
- Built distributed data processing jobs using PySpark, applying Hadoop and Spark concepts to 10+ datasets with 50+ rows
- Wrote data transformation workflows in Python and SQL across 8+ hands-on exercises, applying ETL concepts to structured datasets

CodePath Remote
Technical Cybersecurity Analyst & Applied-AI Engineer Trainee *February 2026 - August 2026*
- Merged an open-source pull request to Apache Burr (issue #272) adding UI server documentation, successfully resolving a high-priority gap flagged by production maintainers in a React/Docusaurus codebase
- Detected 20+ phishing email campaigns by analyzing SMTP traffic across 1000+ packets in Wireshark pcap captures
- Investigated 5 brute-force attempts and unauthorized-access events in Splunk, documenting indicators of compromise per NIST SP 800-61

Apache HertzBeat Blog UI Site Remote
Applied AI Frontend Open Source Contributor *June 2026 - July 2026*
- Debugged and resolved a UI/UX regression in Apache HertzBeat's production documentation web application, iterating through 5+ rounds of code review feedback from maintainers to merge the fix
- Refactored 8 blog components with React swizzling overriding default theming and following project conventions
- Improved responsive layout behavior by restructuring blog components within the existing React codebase to render correctly across 3 screen sizes

Global Career Accelerator Remote
Technical Data Analyst Engineer Trainee *August 2024 - November 2024*
- Built 10+ interactive data visualizations for Grammy.com and Intel Sustainability using Tableau, Python (Pandas, Plotly), and SQL for stakeholders
- Collaborated across cross-cultural teams in 8 states on data challenges using Jupyter Notebook and relational databases to communicate insights
